

# **Component Specification**

# Microbiology

# NFQ Level 5

### 5N0737

# 1. Component Details

Title	Microbiology	
Teideal as Gaeilge	Táirgeadh & Stóráil Prátaí	
Award Class	Minor	
Code	5N0737	
Level	5	
Credit Value	15	
Purpose	The purpose of this award is to equip the learner with the knowledge, skill and competence to participate in basic microbiological work practices or to pursue further education at higher levels.	
Learning Outcomes		Learners will be able to:
	1	Classify microorganisms into bacteria, fungi, protozoa, viruses, and algae
	2	Describe the characteristics of each group of microorganisms
	3	Draw labelled diagrams of the the common bacterial cell shapes, and the components of a bacterial cell
	4	Illustrate the components of a generalised yeast cell
	5	Illustrate the life cycles of bacteria to include the terms lag, log, exponential, stationary and death

- 6 Illustrate the life cycles of fungi to include the terms germination, vegetative growth, sporulation, asexual reproduction, sexual reproduction and fragmentation
- 7 Explain the uses of microorganisms in industry
- 8 Explain endospore formation and potential consequences
- 9 List physical, chemical and biological factors affecting growth of bacteria and fungi
- 10 List and specify sources for the most common types of food poisoning micro-organisms
- 11 Compare factors that render some foods high risk for microbial growth and other foods low risk
- 12 Explain cleaning, disinfecting and sterilising and suitable materials for each
- 13 Outline methods of preventing cross- contamination between raw and cooked foods, and between food handlers and food
- 14 Sterilise materials and equipment using aseptic techniques
- 15 Prepare sterile nutrient and selective media
- 16 Prepare serial dilutions of a sample
- 17 Use a microscope correctly
- 18 Perform staining techniques to include: simple stain, background (negative) stain, spore stain, gram stain
- 19 Prepare isolated cultures of microorganisms from various sources including from body surfaces, soil, water and foods
- 20 Write up an incident report on a laboratory accident
- 21 Distinguish between aerobic and anaerobic microorganisms and facultative anaerobes through laboratory investigations
- 22 Identify basic types of fungi with the aid of a microscope
- 23 Perform safely a series of microbiology laboratory experiments, including lab reports
- 24 Outline a plan to control microbial growth in a variety of situations

	25	Identify common cultures using selective media, including using streak plate technique
	26	Test samples of water for coliforms
	27	Carry out microbiological work practices in compliance with appropriate current health, safety and environmental regulations and controls.
Assessment		
General Information	Details of FET assessment requirements are set out in Assessment Guidelines for Providers.	
	All FET assessment is criterion referenced. Successful achievement of the award is based on learners attaining the required standards of knowledge, skill or competence.	
	The techniques set out below are considered the optimum approach to assessment for this component. In exceptional circumstances providers may identify alternative assessment techniques through the provider's application for programme validation which are <b>reliable</b> and <b>valid</b> but which are more appropriate to their context.	
	Asse acro outc	essment of a number of components may be integrated ss programmes for delivery, provided that the learning omes of each minor award are assessed.
	Grou each	up or team work may form part of the assessment, provided r learner's achievement is separately assessed.
	All p of th will i asse <u>www</u>	roviders are required to submit an assessment plan as part eir application for programme validation. Assessment Plans nclude information relating to scheduling and integration of essment. See current FET validation guidelines at <u>r.qqi.ie</u> .
Assessment Techniques	In or knov outc belo	der to demonstrate that they have reached the standards of vledge, skill and competence identified in all the learning omes, learners are required to complete the assessment(s) w.
	The instr pape the t requ	assessor is responsible for devising assessment uments (e.g. project and assignment briefs, examination ers), assessment criteria and mark sheets, consistent with echniques identified below and FETAC's assessment irements.

Programme validation will require providers to map each learning outcome to its associated assessment technique. See current FET validation guidelines at <u>www.qqi.ie</u>.

All learning outcomes **must** be assessed and achieved

Skills Demonstration	20%
Learner Record	50%
Examination - Theory	30%

#### Description

#### **Skills Demonstration**

A skills demonstration is used to assess a wide range of practical based learning outcomes including practical skills and knowledge. A skills demonstration will require the learner to complete a task or series of tasks that demonstrate a range of skills.

#### Learner Record

A learner record is the learner's self-reported and self-reflective record in which he/she describes specific learning experiences, activities, responses and skills acquired.

#### **Examination - Theory**

An examination provides a means of assessing a learner's ability to recall and apply knowledge, skills and understanding within a set period of time and under clearly specified conditions.

A theory-based examination assesses the ability to recall, apply and understand specific theory and knowledge.

**Recognition of Prior** Learning (RPL) Learners may be assessed on the basis of their prior knowledge and experience. Providers must be specifically quality assured to assess learners by this means. To do so they must complete B10, see Provider's Quality Assurance Guidelines and be included on the Register of RPL approved providers. See RPL Guidelines at www.fetac.ie for further information and registration details.

Grading	Pass	50% - 64%	
	Merit	65% - 79%	
	Distinction	80% - 100%	

Specific Validation Requirements	The provider must have all of the following in place to offer this award: Appropriate laboratory facilities 1.
Supporting Documentation	None
Access	To access programmes leading to this award the learner should have reached the standards of knowledge, skill and competence associated with the preceding level of the National Framework of Qualifications. This may have been achieved through a formal qualification or through relevant life and work experience.
Transfer	Successful completion of this component award enables the learner to transfer to programmes leading to other certificates where this component is a mandatory or an elective requirement.

#### 2. FET Award Standards

QQI award standards are determined within the National Framework of Qualifications (NFQ), <u>http://www.nfq-qqi.com</u>. QQI determines standards for the education and training awards that it makes itself and that are made by providers to whom it has delegated authority to make an award. Providers offering programmes leading to QQI awards **must** have their programme(s) validated in accordance with current validation policy (see <u>www.qqi.ie</u>).

Award standards are designed to be consistent with the NFQ's award classes i.e. major, special purpose, supplemental and minor awards. They are expressed in terms of **learning outcomes** i.e. concise statements of what the learner is expected to know or be able to do in order to achieve a particular award. Learning outcomes for FET awards are contained within the associated specifications:

AWARD CLASS	STANDARDS	AWARDS
Major Award	Certificate Specification	Certificate (Levels 1 to 5) Advanced Certificate (Level 6)
Supplemental Award	Supplemental Specification	Supplemental Certificate (Level 3 to 6)
Special Purpose	Specific Purpose Specification	Specific Purpose Certificate (Levels 3 to 6)
Minor Award	Component Specification	Component Certificate (Levels 1 to 6)

Award standards are thresholds, they describe standards of knowledge, skill or competence to be acquired, and where appropriate, demonstrated, by a learner before an award may be made.

Award standards will be reviewed from time to time as necessary. Minor changes may be made by the QQI executive outside the review cycle where necessary. Changes to standards are published on QQI's website. Providers with validated programmes and providers with delegated authority to make awards are responsible for monitoring relevant standards and making necessary responses to changes.

### 3. FET Credit

Every FET certificate and component specification includes an FET credit value (Table 1). FET credit is quantified in multiples of 5 FET credits (up to 50 hours of learner effort). Learner effort is based on the time taken by typical learners at the level of the award to achieve the learning outcomes for the award. It includes all learning time involved including: guided learning hours, self-directed learning and assessment.

NFQ Level	Major Awards Credit Values	Default Credit Values Minor Awards	Other Permitted Minor Award Credit Values	Special Purpose and Supplemental Award Credit Value Ranges
1 2 3 4 5 6	20 30 60 90 120 120	5 5 10 10 15 15	10 10 5,20 5,15,20 5,10,30 5,10,30	>5 and<60 >5 and<90 >5 and <120 >5 and <120

### **Table 1: FET Credit Values**

#### **Guide to Level**

Learning outcomes at this level include a broad range of skills that require some theoretical understanding. The outcomes may relate to engaging in a specific activity, with the capacity to use the instruments and techniques relating to an occupation. They are associated with work being undertaken independently, subject to general direction.

Strand	Sub-strand	Nature of learning
Knowledge	Breadth	Broad range of knowledge
	Kind	Some theoretical concepts and abstract thinking, with significant depth in some areas.
Know How & Skill	Range	Demonstrate a broad range of specialised skills and tools
	Selectivity	Evaluate and use information to plan and develop investigative strategies and to determine solutions to varied unfamiliar problems
Competence Co	Context	Act in a range of varied and specific contexts, taking responsibility for the nature and quality of outputs; identify and apply skill and knowledge to a wide variety of contexts
	Role	Exercise some initiative and independence in carrying out defined activities; join and function within multiple, complex and heterogeneous groups
	Learning to Learn	Learn to take responsibility for own learning within a managed environment

Insight Assume full responsibility for consistency of self- understanding and behaviour
