

## **Component Specification**

# **Organic Production**

## NFQ Level 5

## 5N2549

## 1. Component Details

Title	Organic Production	
Teideal as Gaeilge	Táirgeadh Orgánach	
Award Class	Mino	r
Code	5N2549	
Level	5	
Credit Value	15	
Purpose	The purpose of this award is to equip the learner with the knowledge, skill and competence to practice organic crop production to approved organic standards and in compliance with EU and Irish regulations and legislation.	
Learning Outcomes		Learners will be able to:
	1	Identify approaches to sourcing seeds and other material inputs for organic systems of production
	2	Examine markets and marketing of organic crops and products to include conducting a market survey, preparing a point of sale leaflet, explaining costing structures and identifying any potential issues
	3	Design a crop rotation plan to organic standards for potatoes, brassicas, legumes and root crops to include varietal selection and sourcing, nutrient management and appropriate weed, pest and disease control

	4	Produce an organic fruit, vegetable or protected crop from propagation to point of sale including all relevant cultivation practices
	5	Compile a fruit or vegetable production programme for a given site to provide a range and continuity of supply taking into account location, soil type, rotation requirements, water supply, availability of protected structures, pest and disease considerations and crop supply demands
	6	Implement procedures to create and maintain a safe working environment including safety standards regarding lifting, carrying and handling plants, tools and equipment.
Assessment		
General Information		ails of FET assessment requirements are set out in sessment Guidelines for Providers.
	ach	FET assessment is criterion referenced. Successful ievement of the award is based on learners attaining the uired standards of knowledge, skill or competence.
	app circ tecł vali	e techniques set out below are considered the optimum proach to assessment for this component. In exceptional sumstances providers may identify alternative assessment nniques through the provider's application for programme dation which are <b>reliable</b> and <b>valid</b> but which are more propriate to their context.
	acro	sessment of a number of components may be integrated oss programmes for delivery, provided that the learning comes of each minor award are assessed.
		oup or team work may form part of the assessment, provided the learner's achievement is separately assessed.
	of ti will ass	providers are required to submit an assessment plan as part heir application for programme validation. Assessment Plans include information relating to scheduling and integration of essment. See current FET validation guidelines at w.qqi.ie.
Assessment Techniques	kno	order to demonstrate that they have reached the standards of owledge, skill and competence identified in all the learning comes, learners are required to complete the assessment(s) ow.
	The	e assessor is responsible for devising assessment

I he assessor is responsible for devising assessment instruments (e.g. project and assignment briefs, examination

papers), assessment criteria and mark sheets, consistent with the techniques identified below and FETAC's assessment requirements.

Programme validation will require providers to map each learning outcome to its associated assessment technique. See current FET validation guidelines at <u>www.qqi.ie</u>.

All learning outcomes must be assessed and achieved

Assignment	20%
Project	50%
Skills Demonstration	30%

#### Description

#### Assignment

An assignment is an exercise carried out in response to a brief with specific guidelines as to what should be included. An assignment is usually of short duration and may be carried out over a specified period of time.

#### Project

A project is a response to a brief devised by the assessor. A project is usually carried out over an extended period of time. Projects may involve research, require investigation of a topic, issue or problem or may involve process such as a design task, a performance or practical activity or production of an artefact or event.

#### **Skills Demonstration**

A skills demonstration is used to assess a wide range of practical based learning outcomes including practical skills and knowledge. A skills demonstration will require the learner to complete a task or series of tasks that demonstrate a range of skills.

Recognition of Prior<br/>Learning (RPL)Learners may be assessed on the basis of their prior knowledge<br/>and experience. Providers must be specifically quality assured<br/>to assess learners by this means. To do so they must complete<br/>B10, see Provider's Quality Assurance Guidelines and be<br/>included on the Register of RPL approved providers. See RPL<br/>Guidelines at www.fetac.ie for further information and registration<br/>details.

Grading	Pass Merit Distinction	50% - 64% 65% - 79% 80% - 100%
Specific Validation Requirements	There are no spec	cific validation requirements
Supporting Documentation	None	
Access	have reached the associated with th Qualifications. Thi	mmes leading to this award the learner should standards of knowledge, skill and competence e preceding level of the National Framework of s may have been achieved through a formal ough relevant life and work experience.
Transfer	learner to transfer	etion of this component award enables the to programmes leading to other certificates nent is a mandatory or an elective requirement.

#### 2. FET Award Standards

QQI award standards are determined within the National Framework of Qualifications (NFQ), <u>http://www.nfq-qqi.com</u>. QQI determines standards for the education and training awards that it makes itself and that are made by providers to whom it has delegated authority to make an award. Providers offering programmes leading to QQI awards **must** have their programme(s) validated in accordance with current validation policy (see <u>www.qqi.ie</u>).

Award standards are designed to be consistent with the NFQ's award classes i.e. major, special purpose, supplemental and minor awards. They are expressed in terms of **learning outcomes** i.e. concise statements of what the learner is expected to know or be able to do in order to achieve a particular award. Learning outcomes for FET awards are contained within the associated specifications:

AWARD CLASS	STANDARDS	AWARDS
Major Award	Certificate Specification	Certificate (Levels 1 to 5) Advanced Certificate (Level 6)
Supplemental Award	Supplemental Specification	Supplemental Certificate (Level 3 to 6)
Special Purpose	Specific Purpose Specification	Specific Purpose Certificate (Levels 3 to 6)
Minor Award	Component Specification	Component Certificate (Levels 1 to 6)

Award standards are thresholds, they describe standards of knowledge, skill or competence to be acquired, and where appropriate, demonstrated, by a learner before an award may be made.

Award standards will be reviewed from time to time as necessary. Minor changes may be made by the QQI executive outside the review cycle where necessary. Changes to standards are published on QQI's website. Providers with validated programmes and providers with delegated authority to make awards are responsible for monitoring relevant standards and making necessary responses to changes.

#### 3. FET Credit

Every FET certificate and component specification includes an FET credit value (Table 1). FET credit is quantified in multiples of 5 FET credits (up to 50 hours of learner effort). Learner effort is based on the time taken by typical learners at the level of the award to achieve the learning outcomes for the award. It includes all learning time involved including: guided learning hours, self-directed learning and assessment.

#### **Table 1: FET Credit Values**

NFQ Level	Major Awards Credit Values	Default Credit Values Minor Awards	Other Permitted Minor Award Credit Values	Special Purpose and Supplemental Award Credit Value Ranges
1	20	5	10	
2	30	5	10	
3	60	10	5,20	>5 and<60
4	90	10	5,15,20	>5 and<90
5	120	15	5,10,30	>5 and <120
6	120	15	5,10,30	>5 and <120

#### **Guide to Level**

Learning outcomes at this level include a broad range of skills that require some theoretical understanding. The outcomes may relate to engaging in a specific activity, with the capacity to use the instruments and techniques relating to an occupation. They are associated with work being undertaken independently, subject to general direction.

Strand	Sub-strand	Nature of learning
Knowledge	Breadth	Broad range of knowledge
	Kind	Some theoretical concepts and abstract thinking, with significant depth in some areas.
Know How &	Range	Demonstrate a broad range of specialised skills and tools
Skill Selectiv	Selectivity	Evaluate and use information to plan and develop investigative strategies and to determine solutions to varied unfamiliar problems
Competence	Context	Act in a range of varied and specific contexts, taking responsibility for the nature and quality of outputs; identify and apply skill and knowledge to a wide variety of contexts
	Role	Exercise some initiative and independence in carrying out defined activities; join and function within multiple, complex and heterogeneous groups

Learning to Learn	Learn to take responsibility for own learning within a managed environment
Insight	Assume full responsibility for consistency of self- understanding and behaviour
