Duration (months)	N/A	24	

Target Learner Groups

The MBA has traditionally been viewed as conversation programme for those coming from a non-business background who seek to gain a broader overview of business strategy and functional areas.

The NCI programme is aimed at candidates with at least three years of work experience, at management level or specialist grade, who are ambitious for their future careers and are seeking to develop a career in senior management. Applicants for the programme will be highly driven and motivated individuals who have a clear focus on their future career ambitions.

Applicants are required to hold a minimum of a level 8 qualification (minimum 2:2 Honours) or equivalent on the National Framework of Qualifications. Non-graduates with very extensive professional experience and/or other prior qualifications may also be considered through the College's RPEL route.

Brief Synopsis of the Programmes

This programme provides learners with a critical insight into the operation and culture of management and the key issues facing contemporary managers in a global context. Learners will develop advanced understanding of the management function across a broad range of business disciplines including Human Resources, Finance, Marketing and Economics, providing them with the ability to analyse and critically evaluate management theory and practice. Learners will learn how to analyse ambiguous data, identify key issues, and devise and implement strategies in order to add value to an organisation. The programme will provide learners with the opportunity to acquire a range of skills which will facilitate them in embarking upon management level careers within an internationally focused business environment.

Physical Resource Requirements

NCI has demonstrated that appropriate physical and digital resources are in place to support the teaching, learning & assessment strategy of the MBA. Physical learning spaces include traditional classrooms, spaces for collaborative learning and access to appropriate technologies as required by individual module curricula e.g. MS word, excel, powerpoint and similar software. Primarily, modules will require:

Active learning spaces with access to computers or support for mobile computing, charging points, high-speed Wi-Fi access, projector, and whiteboard.

Access to computer laboratories with relevant software for some modules (specific requirements for each module is available in the module descriptors – for example SimVenture for Enterprise Simulation Game). Access to Moodle and Microsoft Teams platform.

Access to appropriate library, recreation and dining spaces and functions.

Target Learner Groups

The target learner group for this programme is senior managers seeking to upskill in the area of business intelligence.

Brief Synopsis of the Programmes

Contemporary organisations have the opportunity to take advantage of data with a view towards growth or change of many areas, either directly or indirectly. In this programme, students will learn how to make evidence-based decisions using both primary and secondary data, from a managerial perspective. This learning will encompass the basics of data analytics, how to liaise with data analytics specialists, and most importantly, how to frame business problems in such a way as to arrive at informed decisions efficiently.

Target Learner Groups

The target learner group for this programme is senior managers seeking to upskill in the area of decision making.

Brief Synopsis of the Programmes

This programme will introduce learners to the science of decision-making. A critical skill for managers is the ability to make effective decisions while using good judgement. The programme is designed to help students become effective decision-makers who are able to make the most of their two modes of thought; 'system 1' which is fast and allows us to make fast initiative decisions and 'system 2' which is slower and more analytical.

The programme draws heavily on key findings in the field of decision-making research and demonstrates to students the overlap between multiple disciplinary fields such as psychology, economics, marketing and HR. It examines how individuals (managers, customers, investors and entrepreneurs) and groups of individuals (top management teams) make strategic decisions under uncertainty as well as the factors that affect their decision-making processes.

Target Learner Groups

The target learner group for this programme is senior managers seeking to upskill in the area of sustainable leadership.

Brief Synopsis of the Programmes

This programme will provide an understanding of modern sustainability practices to link business strategy to the natural environment. It addresses the process by which firms integrate environmental concerns into their decision making. There are many reasons to care about how businesses interact with the environment – from basic reasons such as cost reduction and regulatory compliance to more innovative, entrepreneurial opportunities.

Conditions of Validation of the Programmes Covered by this Certificate of Validation

Part 1: Statutory Conditions of Validation

The statutory (section 45(3) of the 2012 Act) conditions of validation are that the provider of the programme shall:

1. Co-operate with and assist QQI in the performance of QQI's functions in so far as those functions relate to the functions of the provider,
2. Establish procedures which are fair and consistent for the assessment of enrolled learners to ensure the standards of knowledge, skill or competence determined by QQI under section 49 (1) are acquired, and where appropriate, demonstrated, by enrolled learners,
3. Continue to comply with section 65 of the 2012 Act in respect of arrangements for the protection of enrolled learners, if applicable, and
4. Provide to QQI such information as QQI may from time to time require for the purposes of the performance of its functions, including information in respect of completion rates.

Part 2 Conditions of Validation Established by QQI Under section 45(4)(b) of the 2012 Act

Part 2.1 Condition of Validation Concerning a Change in the QQI Award or Award Standard

1. Where QQI changes an award title, an award specification or an award standard that a programme depends upon, the provider shall not enrol any further learners on the affected programmes unless informed otherwise in writing by QQI (e.g. by the issue of a revised certificate of validation). The programme is considered validated for learners already enrolled on the affected programme.

Part 2.2 Condition of Validation Concerning the Duration of Enrolment

1. The duration of enrolment is the interval during which learners may be enrolled on the validated programme.

Validation is determined by QQI for a specified number of years of enrolment appropriate to the particular programme as indicated on the certificate on validation subject to unit 9.2.1. It is a condition of validation that the programme does not enrol any new learners outside this interval. A typical duration would be five years.

If a provider wishes to continue to enrol learners to the programme beyond this interval the provider must arrange in good time for it to be validated again by QQI, or exceptionally the provider may apply for extension of the duration of enrolment (unit (14)). In this context the provider may apply for validation of the programme from first principles or, alternatively, the provider may avail of the process for revalidation (unit (13)) by QQI.

Part 2.3 General Condition of Validation

The provider of the programme shall:

1. Ensure that the programme as implemented does not differ in a material way from the programme as validated; differing in a material way is defined as differing in any aspect of the programme or its implementation that was material to QQI's validation criteria.
2. Ensure that the programme is provided with the appropriate staff and physical resources as validated.
3. Implement in respect of the programme its written quality assurance procedures (as approved by QQI).
4. Make no significant change to the programme without the prior approval of QQI. (See unit (8)).
5. Unless otherwise agreed by QQI in writing, start implementing the programme as validated and enrol learners within 18 months of validation.
6. Continue in respect of the validated programme to comply with section 56 of the 2012 Act in respect of procedures for access, transfer and progression.
7. Implement the programme and procedures for assessment of learners in accordance with the Approved Programme Schedule and notify QQI in writing of any amendments to this arising from changes to the programme; see unit (9).
8. When advertising and promoting the programme and awards, use the programme title as validated, and the correct QQI award title(s), award type(s) and award class(es) indicating the level of the award(s) on the National Framework of Qualifications.

9. Adhere to QQI regulations and procedures for certification.

10. Notify QQI in writing without delay of: a. Any material change to the programme; a. Anything that impacts on the integrity or reputation of the programme or the corresponding QQI awards; b. Anything that infringes the conditions of validation; or c. Anything that would be likely to cause QQI to consider reviewing the validation.

11. Notify QQI in writing to determine the implications for the provider's validated programmes, where the provider is likely to, or planning to, merge (amalgamate) with another entity or to acquire, or be acquired by, another entity (see unit (12.5)) .

12. Report to QQI, when required or requested, on its implementation of the programme and compliance with the conditions of validation.

Part 2.4 General Condition of Validation Arising from Specialised Validation Policy and Criteria

1.

Part 2.5 Special Conditions of Validation
