

Dear Sir / Madam,

The white paper on the QA of Research Degree Programmes is a most welcome document.

In addition to its direct and all-encompassing application to research degrees at level 9 and 10, much of its content and provision could also be directly applied to level 9 taught programmes which contain a significant research component (e.g. 30 ECTS).

The College welcomes the opportunity to review its existing QA procedures for project related dissertations in the light of the white paper.

Best Regards,

Tomás
